

100Mbps fiber optic cable router only 10Mbps

Overview

To fix this, go into device manager and uninstall the driver and reboot. This should force it to download the newest available from Microsoft, then you should manually update from there using your motherboard's latest network driver that you can get from their website. I have a modem, connected to a switch and one of those switch cables connected into my D-LINK DIR-825 router (Firmware 7. I tested this cable without router and get 300mbps in my desktop, but when I connect the cable in my router, the lan and wifi connections are limited to 100mbps. After that, change speed and. The current wifi radio power 100 mW for 2. If I disconnect the satellite, I can get 100mbps back, but then Sonos and my Amazon FireStick go bezerk and I have no more coverage out on the patio.
