

24-port fiber optic main distribution frame

Overview

The 24 port fiber optic ODF unit is the convenient cable management for fiber connections, supervising and maintenance. All kinds of types and. ✓ 12 to 144 port configurations for scalable fiber connectivity and management ✓ Includes SC pigtails and couplers for quick plug-and-play installation ✓ Cold-rolled steel housing is durable, rust-resistant, and fits 19-inch racks ✓ Supports high-speed cabling and is compatible with OM1/OM2. The 24-port main distribution frame (MDF) is a foundational element in modern telecommunications and data networking infrastructure. As the central hub of a building's cabling system, the MDF serves as the primary termination point where external service provider lines connect to internal network. This type of ODF is design for large splice tray, excellent armor plate, and has good protection of pigtails. Its box body is made of high quality cold-rolled steel material, and the surface of the product uses smooth electrostatic praying processing. One frame consolidates patching into an incredibly small footprint, with capacity for more than 3,168 LC fibers, or 15,552 fibers using 24-fiber MTP® connections. Kinds of splicing and distribution mark,easy to make fusion and. Optic Distribution Frame (ODF) is a critical component in a fiber optic network infrastructure.
