

90-degree support frame for cable trays

Overview

Galvanised 90 degree angled left "T" bracket suitable for our channel support system. The easy-to-install alternative to conventional support methods is especially suitable for use with cable trays and cable ladders. Support structures can be easily designed and quickly installed. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resilience and safety. For each of these installation challenges in the industrial environment. Cable supports are manufactured according to common standards from high quality raw materials. UNITECH's metal framing channel is cold formed on modern rolling machines from low carbon. The wide-ranging program guarantees that the most diverse applications for wire and cable routing are covered. Sizes and designs can be customized and special dimensions are available on request.
