

AOC Active Optical Cable DML Warranty

Overview

Our AOC cables and active optical breakout cables are fully tested for optical compliance and system compatibility and backed by our industry-leading Limited Lifetime Warranty - Tier 1 Optical Contract Manufacturers - the same manufacturers used by OEMs. Active Optical Cables (AOCs) are Multi-Mode (MM) or Single-Mode (SM) transceivers that have a bonded fiber connection. This creates a complete fiber assembly much like a DAC, but with distances that can reach up to fifty meters. The connector modules cannot be removed from the cable, so all AOCs. Molex Active Optical Cables (AOCs) achieve high data rates over long reaches, using a fraction of the power of other brands while providing streamlined installation for high-performance computing and storage applications. AOC consists of two modules on either end, connected by a section of optical fiber in the middle. Amphenol is a leading innovator in the development and manufacturing of Active Optical Cables (AOCs), delivering high-performance interconnect solutions. Active Optical HDMI Cables provide high-speed, reliable and lossless transmission of audio visual signals, ensuring superior quality performance and experience in various AV setups and environments. Optical fiber conductors can forward optical signals.
