

Base Station Energy Solution 100kWh Technical Specifications

Overview

The following introduces BSLBATT's 100kWh energy storage system solution for microgrid power generation. This 100 kWh Energy Storage System Mainly Includes: Energy Storage Converter PCS: 1 set of 50kW off-grid bidirectional energy storage converter PCS, connected to the demand charges. Charge the battery during low-cost off-peak hours and discharge during expensive peak hours to decrease the power source. Ensure continuous operation of critical government sectors. CTS can offer integrated solar-storage-charging solutions that combine solar PV generation, battery. Micro-grid (Micro-Grid), also known as micro-grid, refers to a small power generation and distribution system composed of distributed power sources, energy storage devices (100kWh - 2MWh energy storage systems), energy conversion devices, loads, monitoring and protection devices, etc. The system integrates lithium battery modules, BMS, EMS, high-voltage distribution and protection, fire safety, air-cooled thermal.
