

Cable tray construction qualification

Overview

Provides technical requirements concerning the construction, testing, and performance of metal cable tray systems. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned in this technical guide only apply to our own cable management ranges and cannot under any circumstances be transposed to si osure, overheating or. The International Electrotechnical Commission (IEC) provides detailed guidelines for cable tray systems under IEC 61537. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. es in the industrial environment.
