

Cable tray slope tool

Overview

The Cable Tray Slope & Fabrication Calculator is a field-ready tool for electrical construction workers who need to quickly calculate V-cut dimensions, bolt hole positions, slope length, and hanger spacing for inclined cable tray installations. Use this tool to estimate sloped section length, horizontal run requirement, cut marks, and installation feasibility. Measure this distance along the straight tray. Eaton's submittal builder tool for B-Line series cable ladder and tray allows you to easily filter, select and download straight section, fitting and accessory submittals. Browse or download the Cable Tray catalog for more information on our line of cable tray and ladder systems. Select a containment product and define alignment, elevation, offset, and bend and branch types and you are ready to start modelling.
