

Can I use a router with a self-operated fiber optic connection

Overview

Yes, a router can work with fiber optic internet. The router connects to a fiber optic modem or Optical. When switching to fiber internet, many users wonder if they're able to use their own router instead of the one provided by their internet service provider (ISP). My router is capable of PPPOE as well as other connection options and I wonder how do I get the details to set it up?

Can you tell us the name of the. Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. how would I set it up to just be standalone when my internet is fibre optics?

I've done everything it says in the manual but it's staying magenta.
