

# Can a cabinet with a front panel be made into a drawer cabinet

## Overview

Once the sides are attached, cut a plywood board as your front panel. Next, you need to install drawer slides for your newly built. To swap out your large base cabinets for drawers, begin by measuring the height and width of your existing cabinet door. If it turns out that it's perfectly square, you should be able to simply cut it in half to convert it into two drawer fronts. You can match existing decor or create a bold new statement. Tired of struggling to find what's. Inset drawers are so much more work than overlay because you have to size your drawer fronts perfectly and then there is tons of fiddle factor involved with the installation because you have to center the drawer front so there is exactly the same amount of space on all sides.
