

Can network cabinets be placed horizontally

Overview

Servers can be placed horizontally and vertically, depending on the number of servers and their types. Consider cabinet dimensions (namely, width and height) to optimize space and achieve compact hardware placement. These. Any reason why I should NOT put a wall-mount network rack on a shelf within a cabinet?

I'm looking to build a network/server cabinet - but I'll be building it within in-built cabinetry (around 600mm depth). But this means internal space is actually going to be probably closer to 550mm which means. It is the delusion that, with enough guys, they can carry a full-size cabinet horizontally through their facility to get it where it needs to be, thereby avoiding the low ceilings/doorways. It is the central cabling infrastructure responsible for data transmission on a specific floor or area within a building.
