

# Choosing a 100Mbps Fiber Optic Wireless Router

## Overview

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Searching for the ideal WiFi router to match your 100 Mbps internet speed?

You're in the right place! In this guide, we'll explore the top routers tailored to deliver optimal performance for your 100 Mbps connection. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price tag. With the many options available on the market, picking the best router for fiber internet can be tricky. I worked with the Cybernews. Struggling with slow speeds, buffering, or weak Wi-Fi signals even though you have a fast fiber-optic connection?

It can be frustrating when your internet provider offers fast speeds, but your router isn't able to keep up. Whether you're working from home, connecting smart home devices, or enjoying your favorite online.
