

Company Intelligent Power Distribution Cabinet Manufacturing Process

Overview

Our production process incorporates advanced intelligent automation technologies—such as smart automated welding systems from Estun and Hipres, intelligent industrial robots, fully automated unmanned wiring lines, and laser cutting equipment—alongside Schneider Electric's 3D. Our production process incorporates advanced intelligent automation technologies—such as smart automated welding systems from Estun and Hipres, intelligent industrial robots, fully automated unmanned wiring lines, and laser cutting equipment—alongside Schneider Electric's 3D. A specialized manufacturer of intelligent manufacturing equipment, producing a comprehensive range of products including power distribution cabinets, secondary protection panels for power grids, hydraulic control cabinets, and complete sets of high- and low-voltage switchgear. Our production. Our main products are power distribution panel, drive panel, PLC panel, remote I/O panel etc. Marker marking module as well as products with surfaces that can be marked (Figure 3). If terminal strip production is not one of the control cabinet manufacturer's core competencies, or if order peaks need to be flexibly managed, external production. Automation and electrical control cabinets for industry, according to your specifications. We efficiently manufacture cabinets according to. With a strong presence in North America, Europe, Africa, and Southeast Asia, our company delivers high-end metal distribution cabinets and full panel systems that meet stringent IEC, ANSI, UL, and NEMA requirements., circuit breakers, contactors, relays, PLCs).
