

Configure DHCP on the ENSP Core Switch

Overview

<Huawei>system-view DHCP Enable #Open DHCP service Interface Gigabitethernet 0/0/0 #Enter the configuration interface [Huawei-GIGABITETHERNET0/0/0] IP Address 192. 1 24 #Configuration IP address [Huawei-GigabitEthernet0/0/0]quit. "Campus Networks Typical Configuration Examples" provides typical campus network networking modes and a variety of deployment examples. So, how do you make this happen. -SVI are created on core -Vlans are created and access ports are configured with the respective vlans on the access. This video explains DHCP working and configuration. A DHCP Server is a network server that automatically provides and assigns IP addresses, default gateways and other network parameters to client devices. It relies on the standard protocol known as. In this case an IP-Helper/DHCP. Become a Member! Lesson tags: DHCP Back to: Huawei Configuration Course > DHCP.
