

Converged Core Switch

Overview

Enables IP routing between VLANs, subnets, and security zones, with advanced routing protocols. Includes dual power supplies, hot-swappable modules, link aggregation (LAG), and support for HSRP/VRRP. Modular chassis or stackable designs make it easy to scale as your network grows. The Cisco® Converged Core is a powerful and innovative solution that can optimize your networking infrastructure as you adopt new technologies. It brings together the past, present, and future by supporting 4G, 5G. A core switch is the backbone of a large-scale network, designed to handle massive volumes of traffic with ultra-low latency and maximum reliability. Sitting at the top of the hierarchical model, core switches interconnect distribution layer switches and provide high-speed data transfer across. Home Products and Solutions InterConnect Switches Products Campus Network Switches Core Switch H3C S10500 Series Switches H3C S10500X Series Multiservice Core Switch H3C S10500X series switch is designed for the core layer of data centers and next-generation campus networks as well as the. It is a powerful backbone switch in the center of the network core layer, which centralizes multiple aggregation switches to the core and implements LAN routing.
