

Costa Rica OLT Optical Line Terminal OSFP

Overview

The product provides 1*XGS-PON/XG-PON ports, 4*GE RJ45, 1*GE type-c uplink ports and 2*10G SFP+ Slots. Users can quickly deploy, configure, and monitor the device via the cloud management, greatly reducing labor and time costs during network construction. At the heart of a point-to-multi-point or passive optical network (PON) is the optical line terminal (OLT). Modern OLTs offer communication service providers (CSP) the ability to launch multigigabit services to tens of thousands of subscribers from a single location or just ten. This manufacturer and trader primarily exports to Indonesia, Costa Rica, and Nepal, offers quality control services, and can provide full and design customization. The positive review rate is 96. HSGQ-TC01 is a box type XGS-PON/XG-PON OLT. So, let's get started with a basic introduction.

Optical line termination

An optical line termination (OLT), also called an optical line terminal, is a device which serves as the service provider endpoint of a passive optical network. It provides two main functions: 1. to perform conversion between the electrical signals used by the service provider's equipment and the fiber optic signals used by the passive optical network.
