

Dcc distribution box

Overview

The DCC-9-BOX is a distribution box specially designed to prepare a multi-unit residential building for the arrival of electric vehicles. Allows the connection of the main power supply and the power supply to the charging station, reducing the initial installation cost. It converts the energy from the network grid AC (Alternative Current). Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required. Electrical Panels – Industrial HT & LT Panels. Air Conditioning and Refrigeration Panels. Distributor boxes bundle several cables into one master cable that is connected to the controller. Thanks to the status indicator, you have an overview of a large number of signals. Distributor box, application: Standard, connection. A distribution board (also known as panelboard, circuit breaker panel, breaker panel, circuit breaker, electric panel, fuse box or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit.
