

Do cable tray bends need to be bridging

Overview

Avoiding Crossovers and Congestion: If trays must intersect, use multi-level layouts or bridges to avoid physical cable crossovers. This reduces cable wear and makes individual cable trays easier to access for repairs and upgrades. Cable ladder systems and cable tray systems shall be manufactured in accordance with BS EN 61537, channel support. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. es in the industrial environment. By providing a controlled pathway, cable tray bends help maintain the integrity and. When using galvanized cable trays, bridge bridging can be achieved through the connection of anti loosening nuts or anti loosening washers. Separation of Electrical and Instrumentation Cables Electrical on Top, Instrumentation Below: Typically, electrical trays are positioned above instrumentation trays.
