

Does the Xiaomi Router 3G support gigabit fiber optic internet

Overview

The Xiaomi Mi Router 3G comes with four upgrades to its predecessor - dual-band, support for USB 3.0, 128MB ROM, and 256MB of RAM. It makes the use of 'Gigabit Ethernet' port design to meet the 100M fibre-class broadband for up to 128 simultaneous devices. The router offers a 128MB SLC Nand Flash and a 256MB DDR3-1200 RAM (model 3 only with 128MB DDR2). The connection options amount to one WAN and two LAN ports with a fast gigabit connection as well as a USB 3.0. Compared with 100-megabit ports, this allows you better utilise every megabit of bandwidth. 4GHz and 2x5GHz, with maximum combined speed of up to 9000Mbps, OFDMA MU-MIMO 4x4, 1GB memory, simultaneous connection of up to 248 devices. 5Gbps support, stable performance under high load, and seamless integration with the Xiaomi Mi Home ecosystem for smart home management.) Why has it been changed?

/ What is your datasource?

(acc.) Searching for pure technical facts?

See table below. Searching for installation. Many Internet Service Providers (ISP) provide modem / router combos, so you get connection that way My ISP does the same, but it gets decently hot and struggles when there's a lot of devices.
