

Field power distribution box pillar

Overview

A feeder pillar cabinet is a secure outdoor enclosure that houses electrical distribution equipment. Sometimes referred to as a power distribution pillar or service pillar, it provides a safe and accessible point to manage, protect and isolate electrical circuits. High-quality materials and robust product designs ensure a reliable connection, signal transmission and power. Available in standard sizes, with an in-house Design Centre for bespoke pre-wired solutions, Lucy Zodion's power distribution enclosures are built with durability and safety in mind. Simply put, when people ask, "what is a feeder pillar?"

", the answer is that it's an outdoor cabinet that houses circuit breakers, fuses, and electrical. Low voltage feeder pillars (LV feeder pillars) are feeder pillar panels that operate at a "Low Voltage" (LV), where "Low Voltage" is defined by the International Electrotechnical Commission (IEC) as a supply system voltage in the range 50 to 1000 V AC or 120 to 1500 V DC (if you're unsure of your. These are a high specification 5mm feeder pillar, with an excellent level of resistance to vandalism. These are a high specification.
