

# Ftth butterfly optical cable

## Overview

GJXFH FTTH Indoor Drop Cable uses butterfly flat structure, whose optical fiber unit is positioned in the centre. Two parallel Fiber Reinforce Plastic (FRP) strength members are placed at the two sides. Then, the cable is completed with LSZH sheath. FTTH indoor cable has a much greater bandwidth to carry data and less susceptible to interference. Central loose tube cables and self-supporting FTTH drop cables are designed for outdoor aerial distribution. With non-metal strength member, suitable for access network and local network in high electromagnetic interfering places. Armored FTTH duct cables are made for connecting user's devices with outdoor feeder cable, especially suitable for duct installation. It features good waterproof and anti-rodents performance. Soft and flexible, good bending performance. Easy to installation, handling and maintenance. Good waterproof and flame retardant performance. Specially used in the FTTH projects- indoor/outdoor installations. With simple installation, FTTH indoor cables can be directly connected to the homes. They are suitable for connecting communication equipments, and used as access building cables in premise distribution system. FTTH Fiber Cable.
