

Full-Stack Data Center Solution

Overview

With efficient virtualization, container, data, and AI modules, the solution enables enterprises to build resilient, reliable, and high-performance data center infrastructure that is open and easy to use, accelerating the digital and intelligent transformation of industries. [Shenzhen, China, February 4, 2026] Enterprise Strategy Group (ESG), now part of Omdia, released a technical validation report confirming that the Huawei DCS Full-Stack Data Center Solution (Huawei DCS solution) fulfills the data center demands of the AI era. With efficient virtualization. NVIDIA GB200 NVL72 powers the new era of computing, delivering 30X faster real-time large language model (LLM) inference with 25X lower TCO and 25X less energy. The NVIDIA Grace™ CPU Superchip is a breakthrough processor designed for modern data centers, delivering 2X the energy efficiency over. The Cisco Nexus Hyperfabric Full Stack AI Infrastructure solution is a turnkey, on-premises AI infrastructure option managed via the cloud-hosted Nexus Hyperfabric controller. It seamlessly integrates high-performance networking, compute, GPUs, storage, and AI software. This solution simplifies. STACK is your trusted digital infrastructure partner, delivering powered land and scalable AI/ML and cloud density solutions to tackle the largest challenges in an increasingly complex landscape. These solutions encompass servers, storage, networking, virtualization, operating systems, middleware, and end-user. Therefore, "turnkey" full-stack IT architecture integration services for data centers have come into being.
