

H3cfege optical module

Overview

Optical modules transmit signals over optical fibers. The. Optical modules are commonly used in switches, network cards, routers and other communications equipment, in the process of using the optical module information can be read to understand its real-time operating status, when there is a link abnormality can be more quickly locate the cause of the. Optical modules are widely used in switches, network cards, routers, and other communication equipment. The following uses the. The H3C SFP-25G-SR-MM850-I compatible SFP28 transceiver provides 25GBase-SR throughput up to 100m over multimode fiber (MMF) using a wavelength of 850nm via an LC duplex connector. Featuring low power consumption, high speed, this 25G transceiver is ideal for 25G Ethernet, and data center, suitable. on a unified wired-WLAN sw e presents a wireless terminator resents omnidirectional signals onfiguration, or software version. It is normal that the port numbers, sample output, screenshots, and other information in the examples differ t documentation to info@h3c. This H3C SFP-GE-SX-MM850-A optics is a high performance and cost-effective small form factor pluggable transceiver. It is suitable for 1000BASE-SX Gigabit Ethernet and 1G Fibre Channel application.
