

High and low voltage complete sets of equipment within the portal

Overview

This solution covers a complete set of power equipment from low-voltage distribution cabinets, high-voltage switchgear to transformers, automation control systems, etc., aiming to provide comprehensive and customized power solutions for various users. Complete set of high and low voltage electrical equipment As an important type of electrical device, complete sets of electrical equipment belong to the category of electrical equipment, similar to switches, contactors, circuit breakers, and transformers, but they have distinct integrated. Our portfolio comprises power distribution boards, busbar trunking systems, distribution boards, protection, switching, measuring and monitoring devices, switches and socket outlets. In distribution systems, they can be used in ring network distribution systems as well as in dual power supply or radial terminal distribution systems. They are known as complete switchgear assemblies because they integrate inside them such. GHS168 is our company absorbing foreign technology and developed the design of the low-voltage drawer-type switch equipment. GGD is a Withdrawable Low Voltage Complete-set Switchgear Equipment with high-reliability versatility and maintain conveniently. XL is a kind of compact structure, convenient.
