

High-temperature resistant composite cable trays

Overview

Composite cable trays provide reliable cable support in corrosive environments where metal trays fail prematurely. Our systems are ideal for chemical plants, wastewater facilities, and coastal installations. The lightweight construction simplifies installation and reduces structural. Eaton's B-Line series fiberglass cable tray systems provide an economical support system with superior strength at room temperatures and dependable load bearing capabilities at continuously elevated temperatures. Made from the highest quality pultruded materials, our Fiber Reinforced Polymer (FRP) cable tray is extremely durable and resistant to chemical attack, with a proven record of. At IndiGrate Composites, we design and manufacture FRP Cable Trays that combine strength, durability, and corrosion resistance to deliver unmatched performance in the harshest environments. Unlike metal trays, composite trays do not rely on galvanizing, painting, or. FRP cable trays are pultruded fiberglass support systems for electrical cabling in wind turbine structures.
