

How to connect cable trays and cable management frames

Overview

The answer: use the right connection accessories for a secure, aligned and continuous cable support system. In most cases, sections of wire mesh baskets or electrical cable trays are joined using couplers, bolts, or proprietary connector kits. These ensure the sections remain structurally sound. Looking to improve your cable organization and create a clean, safe workspace?

In this video, we'll guide you through the step-by-step installation of a cable management tray, designed to keep your cables neatly arranged and secure. more. When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety. es in the industrial environment. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray cont d for instrumentation and control applications that require. Connecting cable trays correctly is essential for system safety, load stability, and long-term performance.
