

How to connect the copper terminals of wires in a distribution box

Overview

Match wire colors to terminals: Brown (live), Blue (neutral), Green/Yellow (earth). Strip wires to the correct length—exposed copper should fit snugly without overhang. Tighten terminals firmly but avoid over-torquing, which damages contacts. Double-check the polarity—reverse. In this video, we'll walk you through the process of wiring a home distribution box with a detailed connection diagram. Follow this guide for a clear and safe connection process: Before starting, always ensure the main power is turned off to avoid electrical shock. It typically includes details such as the circuit breakers, neutral and ground bars, bus bars, and other essential components that meet electrical specifications. Ensure that the power is completely cut off in the. Distribution Box Installation: Put the distribution box on the installation surface, and align the position of the expansion bolts and tighten the screws.
