

# How to plug and unplug the fiber optic cable on the optical module

## Overview

The correct way is to first unlink the optical module and the optical cable, and then connect the optical module. Are you interested in seeing how fiber optic connectors get mechanically plugged into an adapter?

This video goes over common types of connectors, their respective adapters, and how to properly connect and disconnect them. To remove a transceiver from a device: Place the antistatic bag or antistatic mat on a flat, stable surface. Wrap and fasten one end of the ESD wrist strap around your bare. To properly remove the optical cable: Locate the port > Stabilize the device > Gently grasp & pull the plug (not the cable) straight out > Do the same with the other end > Cover both connectors with plastic tips. To remove the plastic tip: Gently twist and pull off the protective plastic tip from. In this step-by-step guide, we will walk you through the process of installing and removing SFP transceiver modules to ensure proper handling and avoid damage to the module or network devices.
