

Huawei dual-port optical module

Overview

The H801X2CS Huawei is a high-performance 2-port 10GE optical uplink board designed for Huawei's MA5600T and MA5680T series OLT platforms. It provides high-speed, stable uplink transmission using 10 Gigabit Ethernet interfaces via SFP+ optical modules. Together, they ensure resilient data center interconnectivity and empower. A switch must use optical or copper modules that have been certified for use on Huawei switches. Huawei is not liable for any problem caused by the use of non-certified optical or copper. A GPON optical module is connected to one SC optical fiber to provide the Gigabit-capable passive optical network (GPON) access service. is a telecommunications network solutions provider. Support 25GE/XGE/GE ports OptiXstar M990 is a 50G PON ONU provided by Huawei.
