

Huawei optical module OLTGPON

Overview

Huawei compatible OM5270S-D2SW is XGSPON & GPON OLT SFP transceiver, operating over Single-Mode Fiber (MMF) optical cable. It has minimum guaranteed optical budget of 34dB for XGPON and 35dB for GPON technology, with in most cases is enough to reach 20km distance. Passive all-optical network access solutions for enterprises, Internet Service Providers (ISPs), and Multiple System Operators (MSOs). All services are executed in a unified manner, with the potential for unlimited. A GPON optical module is connected to one SC optical fiber to provide GPON access service. Otherwise, the optical module may be burnt. Designed for GPON fiber access networks, this SFP-based transceiver offers high optical power, superior receiver sensitivity, and supports transmission distances. Huawei OptiXaccess EA5801E is a box-shaped Optical Line Terminal (OLT) with Gigabit Passive Optical Network (GPON) access, supporting both Passive Optical LAN (POL) and Fiber To The Home (FTTH) solutions.
