

India s fiber optic communication capacity

Overview

India has shown substantial progress in expanding its optical fibre cable (OFC) network, laying a total of 698,010 route kilometres across the country over the last three years, as of 31 March 2025. The Big Tech is moving toward an annual spend of Rs 5000 crore in fibre cable networks. There is a noticeable shift taking place in the fibre landscape. Kerala (81,764 km) and Tamil Nadu (86,944 km) lead, with Andhra Pradesh and Telangana also showing strong growth. The total optical fiber cable deployed for the BharatNet initiative of Government of India is expected to increase. India's optical fiber cable sector is experiencing unprecedented growth, fueled by rapid digitalization, expanding 5G networks, and the increasing adoption of cloud and artificial intelligence (AI). According to a recent CBRE report, India's data center capacity is projected to nearly double from. India fiber optics market size reached USD 517.
