

Installation height of wall-mounted optical distribution box

Overview

The proper installation of a distribution box involves placing it at the right height to ensure safety and convenience. This height also safeguards the box from potential. Datacom Indoor Wall-Mount Fiber distribution enclosure (WODF) is designed for managing high-density fibre splicing in Building Entrance and Floor Telecom facilities. WODF provides efficient cable connections between outside plant and equipment inside the buildings and. ican and relevant standards over the range of optical wavelengths from 1260nm to 1625nm. (The specific height can be adjusted according to the actual situation, for example, the height of the bottom of the indoor installation should be 1. To ensure consistent performance and longevity, it is essential to adhere to strict technical specifications.
