

Integrated Micro-module Maintenance for Data Centers

Overview

The Intelligent Micro Module solution proposes an innovative concept of proactive O&M to monitor, in real time, key, vulnerable components such as batteries, capacitors, air-conditioning fans and valves, and then generate a health assessment report. Highly integrated and flexible installed data center infrastructure for rapid deployment and efficient operation and maintenance Inspur intelligent micro module product adopt factory prefabrication production and on-site modular installation technology for rapid deployment and flexible expansion. The modules' flexibility and predictability are highly valued by large telecom and Internet companies, as well as large- and medium-scale enterprises. It uses racks as the datacenter carrier and fully integrates all sub-systems including UPSs, cooling, power distribution, lightning protection, fire control (optional), wiring, airflow management, intelligent. See how Compass accelerates data center build times using IT pod modules. Accelerate AI deployment with modular pods built for power and cooling. A faster, easier, and more reliable method of building a data center. Founded in 1993, Shenzhen KSTAR Science and Technology Co. (Stock code: 002518) is a global leader in the smart energy field.
