

Integrated transceiver optical cable

Overview

A transceiver is a standalone device that transmits and receives data over fiber optic cables, offering customizable connectivity for your network. What is an AOC?

An AOC is a pre-assembled cable with integrated transceivers at both ends, designed for a complete, ready-to-use. Samtec's Halo® mid-board optical transceivers (IN DEVELOPMENT) are designed for next gen embedded applications demanding 56/112 Gbps PAM4 performance in low profile and ruggedized form factors. Designed for hyperscale data centers, AI/ML, HPC, and telecom applications, our transceivers including 200G, 400G, 800G and. The Relevance Inspector will open in the Coveo Administration Console. Long- and short-range optical connectivity options are suited to a wide range of data center and campus applications. Optical transceivers have enabled the development of high-speed networks, such as 10 Gigabit Ethernet, 40 Gigabit Ethernet, 100 Gigabit Ethernet, and beyond.
