

Intelligent Network Security Equipment for the Campus Network

Overview

In this whitepaper, we explore how Digital Age Networking meets the demands of a digitally transformed campus with a multi-faceted approach to cybersecurity that maintains trust with secure, policy-based access to connected IoT devices such as video surveillance cameras . In this whitepaper, we explore how Digital Age Networking meets the demands of a digitally transformed campus with a multi-faceted approach to cybersecurity that maintains trust with secure, policy-based access to connected IoT devices such as video surveillance cameras . Cisco is a leader in IDC MarketScape for Enterprise Hybrid Firewall. Discover how Cisco Hybrid Mesh Firewall helps to secure organizations. Everything your business needs to collaborate—in the world's first unified, purpose-built suite for hybrid work. Could your network be smarter and more efficient?

With CACI's smart campus network solutions, you can improve performance, cut energy use, and automate routine. While wireless dominates user interaction, the wired Campus Local Area Network (LAN) remains the essential foundation for reliable, high-speed connectivity. It strengthens border protection and endpoint access control, enables networking-security collaborative response, and delivers multi-layered, three-dimensional. Best Network Security Solutions for Campus Networks in 2026 Your Complete Guide Imagine walking into a university campus where thousands of students connect their phones, laptops, and smart devices, simultaneously streaming lectures, accessing research databases, and collaborating on projects.
