

Intelligent Optical Cable Distribution Frame

Overview

High-capacity intelligent ODF (Optical Distribution Frame) stands out as a central component of fiber optic communication infrastructures. These smart frames are designed to effectively manage optical fiber cables, keep connections organized and optimize network performance. Introducing. Network managers need a better solution, one that supports rapid deployment, plug-and-play connectivity and high density—all while maximizing the usable density and long-term value of the fiber network. With a compact, modular frame, high-density plug-and-play elements, and full-frontal access, the. Achieve successful cable management, handle high amounts of fiber cable and add density to fiber frames with the new DCX Optical Distribution Frame (ODF) System which features innovations like flippable cassettes, modular frame design and multiple configuration options. OPNET systems meet today's requirements for tomorrow's applications. These advanced modular fiber optic systems include the full range of passive. It is suitable for surface modification of flexible roll materials, such as copper foil/aluminum foil film, plastic film, teflon, pp film, non-woven fabric and other roll materials.
