

Is it okay to use fiber optic cable for the router's outgoing line

Overview

So yes, you can plug directly in to their cable. You then need to check your modems signal levels and verify if they are good. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). Actually a fiber optic cable has a higher bend tolerance than you might expect. Snazy Labs and Linus tech tips both made a video on how much can you bend a fiber cable until it breaks/affects performance. High-Quality Ethernet Cable: A Cat6a or higher cable is essential for maintaining optimal speeds between your ONT and router. These cables support data transfer rates of up to 10Gbps—critical for preserving fiber's performance advantage. This specialized equipment serves as the.
