

L-type distribution box

Overview

Featuring one M12 L-coded male input and five M12 L-coded female outputs, this junction box simplifies power wiring and improves system reliability—making it ideal for Fieldbus systems, PROFINET networks, and sensor actuator applications. Key Features :The EP9208-1035 EtherCAT Box is a fully passive distribution box. It is supplied via a 7/8" connector. The eight outputs are executed as M12 sockets with L-coding according to EN 61076; the EP9208-1035 is thus suitable for carrying currents up to 16 A at 24 V DC/48 V DC on each of two channels per. With L-BOX System Distribution Boxes, LOYTEC offers the possibility of a decentralized installation of hardware components, e. for the flexible room automation system L-ROC. For the typical requirements of room automation projects with reoccurring segments, the hardware designed for a certain. This publication contains the following new or updated information. This list includes substantive updates only and is not intended to reflect all changes. The M12 Passive Distribution Box L-coded Series is designed with a 1-in, 5-out T-junction configuration, offering a compact and robust solution for power distribution in industrial environments. We'll chat about what each one does, where it shines, and then dive into how to choose the perfect box for your needs.
