

# Large power distribution box with two doors

## Overview

This distribution box features a dual-door design, providing easy access to the internal components, such as circuit breakers, fuses, and wiring. The dual door configuration offers enhanced access for installation, maintenance, and inspection, while maintaining a robust seal to protect internal. Double Door Electrical Enclosures provide an ideal solution for housing larger electrical control systems, power distribution equipment, and complex wiring configurations. These enclosures are characterized by two doors and offer several advantages in terms of accessibility. A double door distribution board, also known as a double door consumer unit or distribution box, is an electrical enclosure used to house the electrical wiring and protective devices for a building's electrical system. Mouser offers inventory, pricing, & datasheets for Double Door Enclosures. Built to IEC 60529 standards, it provides optimal protection against dust, water, and mechanical damage.
