

Light control module pins

Overview

The LDR light sensor module includes four pins: VCC pin: It needs to be connected to VCC (3. DO pin: It is a digital output pin. Pin-4 (G): This pin indicates a. Intelligent Lighting Controls' wiring diagrams show detailed schematics of our solutions. UltraLite Connection Centres or Lighting Control Modules (LCMs) are available in three versions providing ten, six or four 6-pole sockets for. The KLCM allows connection • Switching and control of multiple luminaires • Dimming (DSI & DALI) with four separate channels. • Corridor hold klik LCM occupancy sensors Sensing options are selected via come complete with a 5m RJ11 the kliklink app (e. presence/ lead and have integrated daylight. The CP Electronics range of modular wiring products allows any lighting installation to be completed in minimal time using just five key components.
