

Lightweight cable tray support

Overview

These tray systems allow excellent ventilation and prevent sagging while routing. Cable trays are an integrated, highly flexible cable support system when used in combination with the matching support structures, covers and system-specific accessories. They are available in perforated (RG) or non-perforated (R) versions, in heavy-duty versions (RS/RGS), for use under sprinkler. EzyStrut offers some of the strongest cable trays in their classes, and produces them to a very high structural and visual standard. Cable trays offer continuous support of cables, are lightweight, quick and straight forward to install just about anywhere, and generally mean that changing cabling. The MKS and SKS cable tray systems from OBO Bet-termann have a long tradition. We also. Industrial installations - Cable support systems.
