

MPO Fiber Optic Patch Cord Production Process

Overview

☐☐ Ever wondered how MTP MPO patch cords are made?

Check out this video to see the step-by-step production process—from precision fiber alignment to final testing. 💎💎 It's a fascinating look at how high-performance fiber optic connections are created! Neofibo produces and sells various equipments for the fiber optic production. We have 15 years of experience in patch cord production equipment, which can save you the time of setting up a patch cord production line and provide reliable operation guidance. Our main products cover cable cutting. To address these challenges, the optical networking industry introduced multi-fiber connectivity technologies, most notably MPO (Multi-Fiber Push-On) connectors and the enhanced MTP connector platform. These connectors allow multiple optical fibers to be terminated within a single high-precision. #mpo #ftth #telecom #patchcord
