

Main Fiber Optic Cable Line Maintenance Plan

Overview

Monthly Maintenance: Randomly inspect fiber optic cable connections, test backbone fiber optic link attenuation, and clean connector end faces. Quarterly/Semi-annual Maintenance: Perform OTDR testing on fiber optic lines, verify system alarm records, and update. Fiber optic network optimization has become a key task to ensure efficient operations with the ever-growing demand for data transmission and the increasing need for high-speed, low-latency connectivity. 25 deals with general features in relation to the maintenance and operation of optical fibre cable networks. Some people have suggested that fiber optic networks need periodic maintenance, including microscopic inspection of connectors and mating adapters and even insertion loss testing or taking OTDR traces.
