

Manufacturing Standards for Network Cabinets

Overview

Learn key standards for rack cabinets like EIA-310, IEC 60297, and TIA-942. Ensure safety, compatibility, and future-ready performance. Rack cabinets are used to hold and organize important IT equipment like servers and network devices.

Standardization in rackmount systems is essential for ensuring equipment compatibility, optimal space utilization, and global product interoperability. Three key specifications — ANSI/EIA RS-310-D, IEC 60297-2, and DIN 41494 — have defined the foundation of 19-inch rack design used across. A cabinet or rack must belong to one of the following types: Standard 19-in. Upon completion of the installation, a third party field verification firm will independently verify. DECTTM, PLUGTESTSTM, UMTSTM and the ETSI logo are Trade Marks of ETSI registered for the benefit of its Members. We do not recommend that you use racks that have obstructions (such as power strips), because the obstructions could impair access to.
