

Mauritania Power Supply Unit

Overview

Revised June 2025, this map illustrates energy infrastructure across Mauritania. The locations of power generation facilities that are operating, under construction or planned are shown by type – including liquid fuels, natural gas, hybrid, solar PV, wind and biomass/biogas. Total Energy Supply (TES) 2017 2022 Non-renewable (TJ) 47 995 75 356 Renewable (TJ) 20 449 22 463 Total (TJ) 68 444 97 819 Renewable share (%) 30 23 Growth in TES 2017-22 2021-22 Non-renewable (%) +57. 9 Primary energy trade 2017 2022 Imports (TJ). Electricity is a good that adds massive value to modern life: from having light at night; to washing clothes; cooking meals; running machinery; or connecting with people across the world. 1. Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. According to RPTES/World Bank study,consumption of Energy Mauritania stands to 4 a hydropower potentialin Mauritania. Nevertheless,the country imports hydropower electri ity from Manantali hydropower plant.
