

Modular Solutions for Low-Voltage Cabinets and UPS in Data Centers

Overview

Combining medium-voltage cabinets, transformers, UPS units, and low-voltage cabinets into one modular product, this solution minimizes on-site work by being factory-assembled with copper busbars, ensuring faster deployment. CHINT can provide the "NIPower DC7000" Fusion Power Module, an integrated, prefabricated power solution designed for data centers. That is why modern data center. With the Logstrup Modular System, it is possible to design any Low Voltage Switchboard and switchgear solution that is needed to secure uptime in Data Centers. Eaton's modular data center solutions are custom engineered to site-specific infrastructure requirements including power distribution, IT. ABB Drives is a global technology leader serving industries, infrastructure and machine builders with world-class drives, drive systems and packages. We help our customers, partners and equipment manufacturers to improve energy efficiency, asset reliability, productivity, safety and performance.
