

Mox optical module

Overview

The MOX D module contains an SFP connector for an optical connection (with speeds of up to 2.5 Gbps) or compatible adapters. Even such a switch can be built from MOX. This module can be used only as an extension in a. MOX A (Basic) is a universal network microcomputer with gigabit connectivity and USB 3. MOX A is available in two variants – 512 MB RAM and 1024 MB RAM. Thin-film filter and PLC based AWG for multiplexing, a full suite of components for optical amplification use, optomechanical or MEMS-based switches for protection or surveillance application, Tap PD for power monitoring and VOA for. The Turris MOX is a unique modular router suitable for small and medium enterprises, geeks and the households of all users who are aware of the internet's risks. Thanks to its secure default configuration, automatic firmware updates and adaptive distributed firewall, the product is very secure.
