

# Multimode Fiber GYFTZY

## Overview

GYFTZY Outdoor Cable can accommodate both single-mode (SM) and multimode (MM) fibers, depending on the application requirements. Multi-mode links can be used for data rates up to 800 Gbit/s. Multi-mode fiber has a fairly large core diameter that enables multiple light modes to be. The fibers are positioned in loose tubes that are made of high-modulus plastic and filled with tube gel. The tubes (and fillers) are stranded around a non-metallic central strength member to form a cable core. Then, a LSZH outer jacket is extruded. FRP as. Multimode fiber optic cable (or glass) is a common specification of optical fiber that offers a much wider core size or core diameter of 50-62. Product DescriptionOutdoor Non Armored Single/Multi Mode Fire Retardent GYFTZY DescriptionThe. Outdoor/Indoor Fiber Optic Cable, our annual output is 8,000,000 KM; FTTH/FTTX/FTTA Cable, it is 6,000,000 KM per year; Patch Cord/Pigtails, it is 12,400,000 Pieces per year. What is your payment way?

T/T, L/C, Western Union and Paypal.

Multi-mode optical fiber

OverviewApplicationsComparison with single-mode fiberTypesEncircled fluxExternal links

Multi-mode optical fiber is a type of optical fiber mostly used for communication over short distances, such as within a building or on a campus. Multi-mode links can be used for data rates up to 800 Gbit/s. Multi-mode fiber has a fairly large core diameter that enables multiple light modes to be propagated and limits the maximum length of a transmission link because of modal dispersion. The standard G.651.1 defines the mos
