

# Network server room AC power distribution box

## Overview

Most PDU manufacturers offer a wide range of options including colour matched sockets and metal casings. This allows for custom PDUs to be made to order and on relatively short lead times. The majority of PDUs are installed in AC (alternating current). Most PDU manufacturers offer a wide range of options including colour matched sockets and metal casings. This allows for custom PDUs to be made to order and on relatively short lead times. The majority of PDUs are installed in AC (alternating current) application with some PDUs suitable for (direct current) DC installations. Splitter boxes can be single or three phase (red or blue commando type sockets) and split a source of input power (mains power supply, uninterruptible power supply or generator) into multiple power sources with BS 4343 industrial sockets for load connection. The input cable is BS 4343 - IEC EN60309-2 and feeds a double-pole MCB protecting each socket. PDUs can have a horizontal or vertical form factor which defines how the device is to be installed into a server rack cabinet. Horizontal form factor power distribution units are designed for 483Wmm wide cabinets. Vertical form factor PDUs can be of varying lengths defined by the number of power sockets or outlets. The standard single phase PDU socket. Metered power distribution units provide power management information including voltage, frequency, load power in VA and Watts and energy used (kWh). This is useful for both general load and power management and in a co-location environment for tenant energy billing. The metering potential may be for the total PDU power usage or down to individual sockets. The following table shows the main power distribution outlets and plug types available. Please let us know if you need a custom project or cannot find the configuration you need. IEC 60309 is often referred to as an industrial plug and socket and may be used to provide power to higher power PDUs. A typical configuration could use this type of...
