

No image is displayed when the bridge is connected to the switch

Overview

You can fix it by checking your HDMI cables and ports, ensuring that the TV input is correct, adjusting the TV resolution settings, updating your Switch, turning off certain settings, and more. If your television isn't displaying an image when using TV Mode, please follow the procedure below to reconnect your console. First, remove your console, AC adapter, and HDMI cable from. The first situation is when the Nintendo Switch is docked there is no image displayed on the TV screen. Secondly, Nintendo Switch will not take up from the sleep mode while it is docked. Then the "no signal" message comes on the tv. This wikiHow will show you how to troubleshoot your Nintendo Switch when it won't connect to. When you connect your Nintendo Switch OLED to a television screen, monitor or other display devices that have a HDMI port, you may get a blank screen.
