

OSFP112 Optical Module

Overview

The STC-800G-2xDR4 OSFP112 is an advanced optical transceiver module designed for high-capacity short-reach data center and hyperscale environments. Designed and engineered to accommodate customers high usage 2000 cycles at -40°C to 85°C, the loopback module series are the most reliable products in the market to enable the quickest customers systems production and deployment. Software defined multiple power consumption may emulate the optical. Among these cutting-edge solutions is OSFP112 (Octal Small Form-factor Pluggable 112), which provides more bandwidth while consuming less power and being more dependable. The module. 800G-2xLR4 OSFP112 based on EML. 8 channels of 100G-PAM4 electrical data, 2 sets of 4 CWDM lanes MUX/DEMUX design, 10km maximum reach via single mode fiber, case temperature range of 0°C-70°C, comply with IEE802. 3ck and QSFP-DD MSA standards, and support CMIS5. Products are mainly used in 800G.
